

Jufrey Niño Bayog

WordPress & Web Systems Developer

+63 965 210 0539 | jufreyninobayog@gmail.com | <https://jufreyninobayogportfolio.com/>

WordPress and Web Systems Developer with 5+ years building, maintaining, and optimizing websites for agencies and businesses across the Philippines, the United States, and Canada — through both a stable in-house role and an ongoing freelance/contract practice. Strong expertise in WordPress development, performance optimization, and hosting, domain, and DNS management — handling full website lifecycles from development through deployment and ongoing support.

SKILLS & TECHNOLOGY

WordPress & Page Builders: WordPress, Elementor, Divi, Bricks, WPBakery, Advanced Custom Fields (ACF), WooCommerce, Gutenberg, Custom Post Types

Frontend & Web Application Development: HTML, CSS, JavaScript, jQuery, Astro, Next.js, React, TypeScript, Tailwind CSS

Backend & Frameworks: PHP, Laravel, CodeIgniter, MySQL, Bootstrap, Gentelella

Hosting, Domain & DNS: Hostinger, cPanel, GoDaddy, Vercel, Netlify, Cloudflare, website migration, backup & restore

Data & Integrations: Supabase, PostgreSQL, REST APIs, Stripe, PayPal, GoHighLevel, GA4, Google Search Console

AI-Assisted Development: Claude, Claude Code, ChatGPT, Cursor, GitHub — used to accelerate implementation, debugging, and code review, with architecture, testing, security, and final QA developer-led

Performance & Maintenance: WP Rocket optimization, responsive & cross-browser testing, bug fixing and troubleshooting

PROFESSIONAL EXPERIENCE

Freelance / Contract WordPress Developer

Jan 2024 – Present

Independent — Philippines, United States, Canada

Working independently with agencies and direct clients on fixed-scope WordPress projects — site builds, ongoing maintenance, hosting/DNS support, and migrations.

Spirit Media (United States) — AI Agency

Jan – Feb 2026

- Returned as an AI-Assisted Developer after the agency's pivot from WordPress web design to AI-driven books and websites
- Contributed to AI-generated book production and platform workflows

Business Registry Corporation (Canada)

May – Nov 2025

- Developed and maintained WordPress websites for business registration services
- Built and customized Gravity Forms workflows for Canadian government filings, including logic, validation, and secure submission handling

Neighborhood Plumbing and Drain

Aug – Sep 2025

- Handled ongoing website maintenance and development
- Built and updated service pages and conversion-focused landing pages

Whitehead Agency Group (Canada)

Jul 2024 – Apr 2025

- Led WordPress development and maintenance across multiple client websites
- Built sites from scratch using Elementor, Bricks, WPBakery, and Divi
- Managed hosting, domains, DNS, backups, and migrations

Rava Digital (Philippines)

Apr – Jun 2024

- Handled WordPress development and maintenance for agency clients
- Implemented layout updates, responsive fixes, and performance improvements

Spirit Media (United States)

Jan – Apr 2024

- Converted Figma designs into fully functional WordPress websites using Elementor, Bricks, WPBakery, and Divi
- Implemented WP Rocket optimizations and responsive testing
- Created custom post types and fields, customized backend templates, and resolved bugs
- Engagement concluded as the agency shifted its model from WordPress web design to AI-driven books and websites

Website Developer

2021 – 2023

National Meat Inspection Service — Philippines

- Built and customized WordPress websites alongside internal system development
- Assisted with backend customization, updates, maintenance, and bug fixing

Freelance WordPress CMS Designer

2019 – 2020

Independent — Philippines

- Designed user-friendly, visually appealing WordPress themes and templates
- Implemented plugins and widgets, optimized for mobile responsiveness and on-page SEO
- Clients: Meler Production, Elopement Wedding Planner, United Realty Group, Randell Tiongson Personal Finance
